

Reducer Pipe Fitting

Zhejiang Bewell Steel Industry Co., Ltd. is the "leading brand in the steel industry", is a well-known manufacturer of Bewell® reducer pipe fitting and stainless steel pipes in China, with "science and technology, environmental protection, innovation" as the values of research and development and production of products, leading the enterprise into the market, towards the diversified economic field, to To achieve sustainable development of the enterprise, we are determined to pursue the development and growth of the enterprise, and strive to achieve the harmony and prosperity of the society, and look forward to the future.

Product Description

Bewell® Reducing couplings, also known as reducers, are one of the chemical pipeline fittings used for the connection of two different pipe diameters. Reducing joints are a kind of pipe fittings used in the reducer of pipes. Usually the forming process used is shrink pressed, expanded pressed or shrink plus expanded pressed, for some specifications of the reducer pipe can also be used for stamping forming

Parameter(Specification) of the Bewell® Reducer Pipe Fitting

Product name	Bewell® Reducer Pipe Fitting
Material	Stainless Steel
MOQ	5 Tons
Usage	Construction Decoration
Key word	Reducer Pipe Fitting
Length	1-12m
Thickness	1-50mm
Color	Silver
Size	Customized Size
Sample	Provide

Feature and application of the Bewell® Reducer Pipe Fitting

Features:

Surface galvanized
wear - resistant
corrosion - resistant
long service life

Application scenarios:

It is widely used in chemical industry, construction, water supply, drainage, petroleum, light and heavy industry, refrigeration, sanitation, plumbing, fire-fighting, electric power and other basic projects.
